Activities

The proposed planning should give a realistic representation of what you intend to implement. Of course, all plans must evolve. During implementation you will be allowed to change details such as destinations, the number of participants and duration of activities, as long as you continue working towards the same objectives.

The purpose of this section is to calculate the budget needed to implement your planned activities. You can use the button below to read the detailed funding rules and better understand the calculations below. The section introduces an important new concept: 'Mobility flow'. A mobility flow is a participant or a group of participants going to the same destination for the same duration of time and with same arrangements. If some participants going to the same destination need to have different arrangements (for example, different travel distance or mode of travel, different duration, Digital Erasmus, etc.) then you should split that mobility flow into two or more separate ones to be able to specify the differences. It is allowed to have more than one flow going to the same destination.

The information that you provide in this table will be automatically copied in the budget details. You can come back to this table at any point in case you want to change the data or separate a mobility flow into two.

Mobility flow ID	ing	Duration for accompanying persons (in days)	Digital Erasmus	Green travel	Acciones
GRP-01					Delete Go to

Cada tipo de actividad se puede seleccionar solo una vez y para cada una se pueden añadir flujos de movilidad a distintos destinos.
