European Campus for Sustainability and Innovation towards a Blue-Green Society Sustainability Horizons Alliance

BLUE CAMPUS alliance is the convergence of seven complementary universities. The alliance responds to social and societal challenges for high transformative impacts in their territories.

The Alliance amplifies transformative capability and generates scale much beyond the ombined reach of the participatin universities.

Partner organization

Geographic proximity, as well as historic, cultural and linguistic links consolidate the potential for global projection.

Even before converging, these HEI were responsible for remarkable impacts in their territories' transformation. These are young HEIs, result and cause of territorial innovation, from small cities at EU periphery (Faro PT / Tromso NO). By nature, these are institutions open to innovation, used to generate, manage and transfer knowledge with deep socio-economic relevance and environmental regional impact.

The BLUE CAMPUS ambition is to better prepare universities for a stronger contribution to a healthy society.
